## LUKE W. SYDOW

LANDSCAPE ARCHITECT

Luke has extensive experience working as a Landscape Architect in Wisconsin, Colorado and Minnesota. His expertise in all aspects of site planning, park design, grading and landscape design makes him particularly well suited for Landscape Architecture services. He has managed a wide range of commercial facilities to park designs, both public and private.

Raised in Duluth, Luke has the background and knowledge needed to work in the Northland. Returning to Duluth allowed him to take advantage of the Northlands opportunities.

His experience includes a strong background in park planning, park design, trail masterplanning, urban design, residential design, construction documentation, construction observation, graphics and public presentations. He also has extensive skills using AutoCAD, ArcView and Quark as well as word processing software.

As a project manager, he has successfully completed numerous projects varying in funding from \$8,000 to \$12.1 million dollars. In addition to technical skills, Luke's ability to work with clients is his true talent. He has worked closely with a variety of clients from single family homeowners, city staff to multiple developers on a single project.

Prior to working with Winston Associates, Luke worked for three years with RLK Associates (now RLK/Kuusisto) in Minnetonka, Minnesota.

He adds diversity to each project from studies in Australia, extensive travels throughout Europe, South America and the United States.
